

sample relocation services

“When it comes to maintaining the integrity of clinical specimens and investigational drugs, temperature and time are the two enemies that are always working against you. Creating adequate safeguards to protect this critical cargo is itself a science.”

Applied Clinical Trials
Clinical Trial Shipping: The Essentials
June 1, 2005

Our sample relocation suite of services is customized to support transporting, retrieving or combining small to large sample shipments at research sites, storage centers, testing laboratories or within your company.

Suite of Global Sample Relocation Services:

Relo
Standard

Allows easier shipment of global samples through the use of our qualified transportation and packaging suppliers and facilities.

Relo
Enhanced

Brings our global sample logistics and packaging team to your facility or testing site to support transport of your small to large shipments using our qualified transportation and packaging suppliers.

Relo
Custom

Provides our global sample logistics and packaging team and our **Relofleet** vehicles to support bulk, cold-chain shipments for ultimate sample control.

Qualified Transportation and Packaging Suppliers – Ground, air and **Relofleet** custom cold chain transport services are available.

Trained and Certified Global Sample Transport Team – IATA and US DOT trained and certified logistics and packaging personnel.

Certified Cargo Screening Facility – One of only a few biorepositories approved by the US Transportation Security Administration to pre-screen shipments at our facility, thereby avoiding possible screening delays at the airport.

Intelligent Sample Inventory Storage System (ISISS) – Innovative real-time sample tracking database delivers a 24/7 complete audit trail of sample movement from site to site.

The benchmark in sample management™

BioStorage Technologies' specialized cold chain transportation team ensures that shipments arrive at the right place, at the right time, in the right condition, while passing along a savings of 30-50% on traditional sample relocation.

Selecting a Transportation Service Option:

Location	Relo Standard	Relo Enhanced	Relo Custom
Global - All countries	X	X	X
Sample Shipment Type			
Relocation of biomaterials, clinical trial samples, API and manufactured drugs	X	X	X
Movement of freezers (with or without samples)			X
Movement of temperature controlled shipments (including palletized material)			X
Temperature			
Accommodates all temperatures from frozen to ambient	X	X	X
Liquid nitrogen shipments	X	X	X
Monitor temperatures inside packages via temperature loggers		X	X
Monitor temperatures within freezers or refrigerators during relocation			X
Dual-temperature trailer; two separate compartments to support multiple temperatures simultaneously supported by several back-up refrigeration units			X
Sample Packing			
All packaging supplies staged at your location including cartons and dry ice	X	X	X
Transportation of inbound sample shipments prepared by the client	X		
Certified sample transport team manages the organization & packing of the samples at the pick-up location		X	X
Tracking/ Monitoring			
Point-to-point tracking, re-icing, & real-time issue resolution	X	X	X
Nine security cameras accessible remotely for tracking sample shipments			X
Temperature tracking of samples within our transport vehicle and real-time data transmission to a BioStorage Technologies facility			X
Compliance			
Chain of custody	X	X	X
Built-in mobile work station conforms to 21 CFR Part 11 compliance standards			X
Audit trail of sample movement from site to site via ISISS database	X	X	X
Domestic, international, hazardous and non-hazardous shipments prepared	X	X	X
