

Experienced Engineering, Proven Results

RND Group Reviews Record Breaking Year

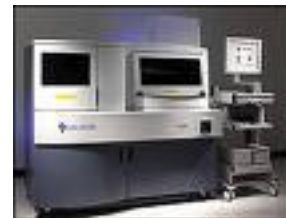

INDIANAPOLIS, IN – January 07, 2009 – The RND Group, recognized leader for Software Development for the “Life Sciences” industry, today reported that 2008 was a record breaking year for the Software Engineering firm. In terms of continued commitment to current clients, growth with new clients, and recognition within the “Life Sciences” industry around the nation, the RND Group experienced an extraordinary year in 2008.

“2008 was the best year in our eleven year history.” said Tim DeFrench, President, RND Group. “More and more clients have sought us out around the nation to provide FDA Compliant Software Engineering for their Medical Devices. With multiple projects already booked, we see continued growth in 2009”.

Record Breaking Growth: RND’s revenue grew by 16% in 2008 over 2007 and 81% over 2006’s revenue. In response to this growth the RND Group has increased their number of software engineers by 66% since the beginning of 2007. Among the notable successes in 2008, The RND Group’s client, Osmetech, received FDA clearance for its second generation eSensor XT-8 molecular diagnostics platform and The RND

Group’s client, Gen-Probe announced in 2008 that the US Food and Drug Administration (FDA) approved its supplemental regulatory application to use the PROCLEIX(R) ULTRIO(R) assay to screen donated blood for the hepatitis B virus (HBV). This Record Breaking Growth comes from referrals, which led the RND Group

to new clients and new employees. We attribute RND’s growth to our major focus and expertise with **“Next Generation Molecular Diagnostic Medical Devices.”** “Global Life Science companies, who are in their planning phase of their ‘Next Generation, medical devices, have sought out RND to begin Software Engineering at the Requirements stage of their Product.” says Tom Gardner, VP Business Development, RND Group. “We are experiencing wonderful growth as a company, and we get the added bonus of seeing our work bettering people’s lives.” says Tom.

About the RND Group

The RND Group provides full life cycle software engineering services specializing in medical device product development for FDA regulated products. We work with companies by partnering with their product development organizations in providing project management, requirements management, software engineering, and product testing services as needed to complement our clients' existing engineering departments. www.rndgroup.com

RND is proud to be celebrating ten years of providing quality software engineering services to our customers.
